

Sweet Season Quilts

Pre-fused & Laser-cut Applique' Kits

Thank you for purchasing one of my kits!
Here are the steps you should follow to get started . . .

Step One . . .

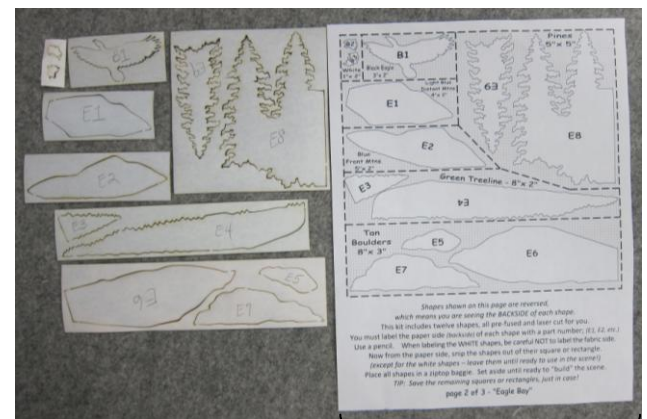

Let me start off by saying that the fabrics in my kits are NOT cut to size!
 You must read the pattern directions for cutting the size of all the "B"s".
 (which are fabrics for the Backing, Batting, Borders and Background)
 For many kits, you must also stitch background fabrics together.
 If so, be sure to press the seams open so that the background lays flat!

Step Two . . .

Appliqué shapes must be labeled. Remove all appliqué Shapes from kit bag. Using a pencil, label the paper side (the backside) of each shape. Part numbers or names can be found on pattern appliqué pages. These pages show the backside of the appliqué shapes, making it simple to match each and label shapes accurately.

Note: Be careful to NOT label the fabric side of white shapes!

Labeled applique' shapes Applique' page from kit pattern.

Step Three . . .

If shapes are part of a rectangle or square, you must snip them apart. Always snip shapes apart from paper side; much easier to see where to snip!
 Place shapes in baggies according to PART numbers, NOT by color. Some examples: all "B" shapes in a "B" baggie, all "FA" shapes in "FA" baggie, etc.
 TIP: do not snip out tiny shapes until ready to use them!

Labeled shapes AND snipped apart (from paper side)

Tiny shapes are not snipped apart until ready to use.

Step Four . . .

Refer to pattern for complete, step by step, and tested directions.
