

Sweet Season Quilts

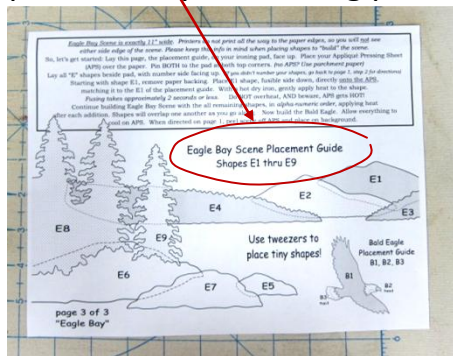

Placement Guides and Pressing Sheets

Step One . . .

You will need the appliqué shapes from the kit bag – they must be labeled, sniped apart, and place in baggies according to their “part number”. *See Laser-cut Fusible Web for Kits.*
You will also need the Placement Guide (PG) from the kit pattern AND your Appliqué Pressing Sheet (APS) OR one sheet of parchment paper – *but not the organic brand – trust me on this!*

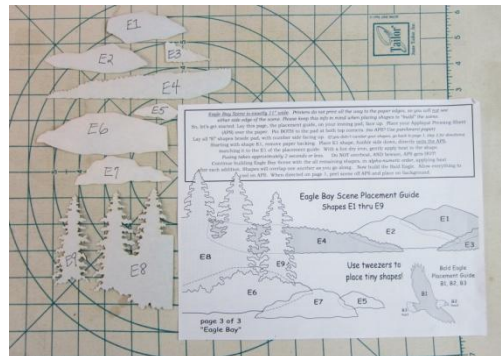

Step Two . . .

Lay the PG from the kit pattern on your ironing pad.

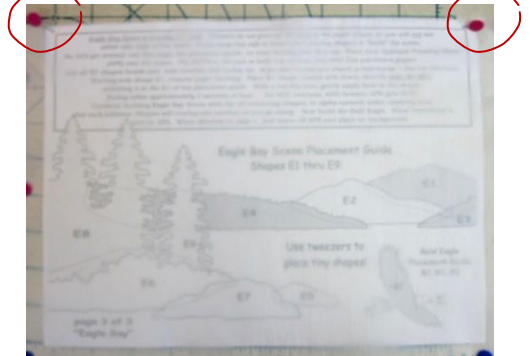

Step Three . . .

Lay the labeled appliqué shapes on side of page, number side up.

Step Four . . .

Position your APS over the PG. Pin both TOP corners to pad.

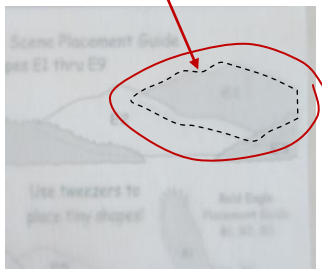

Step Five . . .

Locate shape #1 on PG, remove paper backing from shape #1

Step Six . . .

Place shape #1, fusible side down, directly on the APS. It matches the PG shape perfectly.

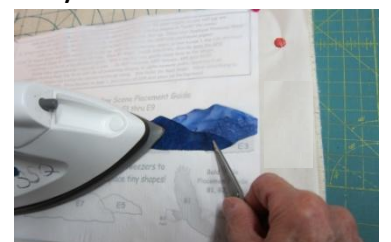

Step Seven . . .

Hold shape in place with tip of scissors. Using a hot, dry iron, apply heat for **TWO seconds.**

Step Eight . . .

Add shape #2, and continue adding shapes in alpha-numeric order! Shapes will *overlap* as you build the scene.

Step Nine (peel) . . .

Allow scene to cool on APS, then peel off as one fused unit. Place on background following directions in kit pattern.

Step Ten (place) . . .

TIP . . .

Use tweezers to place tiny pieces.
